IXON Rock by Busch + Müller:

High-end battery light with brilliant 100 Lux technology

With the IXON Rock, family-run Busch + Müller has developed a new battery-powered headlight with a high-grade aluminium casing
The result: A headlight with 100 Lux output, finding a balance between premium performance and compactly appealing design.

IXON Rock is not only bright: At the same time, it meets highest demands regarding width, breadth and homogeneity of the light field.

Another eye-catcher is the charging status display. Ten blue LEDs, five on each side, shine laterally and integrate themselves into the design. When the battery nears depletion, another red LED shines in the push button on top.

The headlight may quickly be charged via USB in only three hours.
Useful: During daytime, the headlight can become a power bank, supplying mobile USB devices with up to 1,500 mAh.

- Light output and duration:
 - 100 Lux up to 2.5 hours
 - 50 Lux up to 6 hours
 - 15 Lux up to 25 hours
- Quick USB charging: 100 % in three hours
- Power bank function supplies up to 1,500 mAh
- Battery indication via ten lateral, blue LEDs
- High-grade aluminium casing
- Turn/lock handlebar mount for Ø 22-32 mm
- With German mark of approval

IXON Rock, Type 198

German SRP €99.00

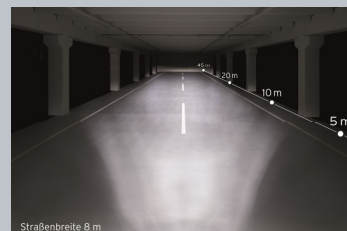

Available spring 2021.
